The forest contains a System Center 2012 Operations Manager infrastructure.Your company, named Contoso Ltd., has a partner company named A.Datum Corporation. The A.Datum network contains an Active Directory forest named adatum.com. Adatum.com does not have any trusts. A firewaII exists between the A.Datum network and the Contoso network. You configure conditional forwarding on all of the DNS servers to resolve names across the forests.You plan to configure Operations Manager to monitor client computers in both of the forests. You need to recommend changes to the infrastructure to monitor the client computers in both of the forests.What should you include in the recommendation? (Each correct answer presents part of the solution. Choose two.) A.   Allow TCP port 5723 on the firewall.B.   Deploy a gateway server to adatum.com.C.   Create a DNS zone replica of adatum.com.D.   Allow TCP port 5986 on the firewall.E.   Create a DNS zone replica of contoso.com.F.   Deploy a gateway server to contoso.com. Answer: AB Explanation: A: Gateway, System Center Management service, 5723/TCPB: if there is a firewall between the agents and management servers, multiple authorized endpoints must be defined and maintained in the firewall rules to allow communication between them.To reduce this administrative overhead, Operations Manager has a server role called the gateway server. Gateway servers are located within the trust boundary of the agents and can participate in the mandatory mutual authentication. Because they lie within the same trust boundary as the agents, the Kerberos V5 protocol for Active Directory is used between the agents and the gateway server. Each agent then communicates only with the gateway servers that it is aware of. The gateway servers communicate with the management servers.http://technet.microsoft.com/en-us/library/hh212823.aspx http://technet.microsoft.com/en-us/library/hh298610.aspx QUESTION 31Your company has a private cloud that is managed by a System Center Service Manager 2010 Service Pack 1 (SP1) infrastructure.The infrastructure contains four servers as shown in the following table.You upgrade MGT1 and DATA1 to Service Manager 2012.
